

# ÁNGEL ALFÉREZ CASTRO

SAP ABAP Developer · SAP Technical Consultant
ABAP Cloud · RAP · S/4HANA · SAP BTP · Integration Suite · CAP · Fiori
5× SAP Certified 2026 · C_ABAPD · C_CPE · C_CPI · C_FIORD · C_JSD
8 years in meat processing: goods receipt, batches, FEFO (MM-IM)

## ***PROFILE***

SAP developer certified in ABAP Cloud, CAP, Integration Suite and Fiori, with 8 years in the meat processing industry managing goods receipt, batches, shelf life and traceability on LIBRA ERP (Edisa). I took part in its rollout and trained 40-50 plant operators. I know first-hand the processes SAP covers in MM Inventory Management, including the dual unit of measure handled by Catch Weight, and I have built that process in RAP on SAP BTP following Clean Core principles.

## PROJECTS

- 2026 | GOODS RECEIPT WITH BATCH MANAGEMENT AND DUAL UNIT OF MEASURE · RAP / ABAP Cloud. *github.com/alcaan16/zgr-goods-receipt*
  - Managed RAP BO with draft and three levels (Receipt, Item, Batch), OData V4: 7 determinations, 7 validations (including average weight per piece and minimum shelf life) and 4 actions with feature control. Logic in standalone classes: 32 ABAP Unit tests, ATC clean.
- 2026 | BATCH TRACEABILITY · CAP / Node.js. *github.com/alcaan16/cap-lot-traceability*
  - 8 entities and FEFO consumption split across supplier batches down to the finished-product batch. Atomic: if stock is insufficient, nothing is written. Runs locally.
- 2026 | EXPIRY ALERTS FROM GOODS RECEIPT · iFlow on SAP Integration Suite. *github.com/alcaan16/cpi-expiry-alerts*
  - Timer-triggered iFlow processing a real response captured from the RAP project's OData API: draft filtering and Receipt-Item-Batch mapping in Groovy, HTTPS delivery, and an Exception Subprocess tested with the receiver down.

## EXPERIENCE

- ***OCTOBER 2017 - AUGUST 2025*** | LA CARLOTEÑA ASADOS. Logistics & Inventory Control Manager · Team of 4 · Meat processing (chicken, turkey, pork).
  - Involved for ~2 years in the rollout of LIBRA ERP (Edisa) across goods receipt and production: helped set up weight recording at goods receipt, deboning and further processing, and trained 40-50 plant operators on the system.
  - Receipt and control of ~30,000 kg per day (~10 trucks/day) with verification against the delivery document, handling of discrepancies with suppliers and warehouse organisation.
  - Dual unit of measure: simultaneous recording in units and kg per pallet (e.g. 320 units / 650 kg), the scenario SAP covers with Catch Weight. Traceability from supplier batch to internal production batch, shelf-life control with date-based rotation (FEFO criterion) and inventory adjustment through periodic counts.
- ***OCTOBER 2007 - FEBRUARY 2008*** | CIAC. Systems Technician.

## EDUCATION

- ***SAP CERTIFICATIONS***
  - ***2026*** | SAP Certified Associate - Back-End Developer - ABAP Cloud (C_ABAPD). RAP (RESTful Application Programming Model), CDS view entities, OData V4 services, ABAP SQL, OO ABAP and Clean Core extensibility on S/4HANA.
  - ***2026*** | SAP Certified Associate - Backend Developer - SAP Cloud Application Programming Model (C_CPE). CAP services with Node.js on SAP BTP: data model, service logic and side-by-side extensions.
  - ***2026*** | SAP Certified Associate - Integration Developer (C_CPI). SAP Integration Suite: iFlow design, mappings and error handling between S/4HANA and external applications.
  - ***2026*** | SAP Certified Associate - Fiori Application Developer (C_FIORD). SAPUI5, Fiori Elements, UI annotations on OData V4 services, MVC architecture.
  - ***2026*** | SAP Certified - Joule Studio Developer (C_JSD). AI agents and skills with Joule Studio on SAP BTP (hands-on exam).
- ***TRAINING***
  - ***2026*** | EXPERIS ACADEMY · 270h of official SAP training: ABAP Cloud Back-End Development (205h) and SAP Business Technology Platform (65h).
  - ***2025 - PRESENT*** | SELF-TAUGHT FULLSTACK (MERN). Node.js, TypeScript, React, MongoDB and Docker in personal projects: the technical foundation for CAP.
  - ***2008 - 2010*** | HIGHER VOCATIONAL DIPLOMA IN COMPUTER SYSTEMS ADMINISTRATION (Técnico Superior) · I.E.S. Gran Capitán, Córdoba (Spain).

## SKILLS

- ***BUSINESS & PROCESS (MM-IM)*** · Inventory and warehouse management · Batch management and batch traceability · Shelf life (SLED) and FEFO rotation · Dual unit of measure (Catch Weight) · Food and meat processing sector · LIBRA ERP (Edisa).
- ***SAP & DEVELOPMENT*** · ABAP Cloud (RAP · CDS · Clean Core · OO ABAP) · SAP BTP · CAP (Cloud Application Programming Model) · SAP Integration Suite · SAP Fiori (SAPUI5, Fiori Elements) · Node.js · TypeScript · JavaScript (ES6+) · REST APIs · Docker · Git/GitHub.
- ***ENVIRONMENT & DATA*** · SAP BTP ABAP Environment · SAP Business Application Studio · Eclipse ADT · VS Code · Postman · SQL · MongoDB.
- ***LANGUAGES*** · Spanish (native) · English B1.
